Looking out over a stunning view is awe-inspiring. Becoming a part of it is nothing short of remarkable, and that is what this pool permits. Designed and built by Crystal Pools, the pool has transformed a natural marvel into an interactive space made for both fun and relaxation.

Driving this metamorphosis is the family lap

pool, designed and constructed to marry the clients' home with the water's edge to create a never-ending horizon that begins in their own backyard. It not only dramatically increases the value of the home, but it enhances the clients' lifestyle and the surrounding environment.

The pool was designed to connect the residence to the sprawling coastline while

creating an ambient atmosphere in harmony with the character of the home. It serves as an example of the Crystal Pools philosophy of quality without compromise and surpasses the clients' expectations. Constant communication between the clients, designer and builder ensured the pool was a success and delivered the desired impact.

A strong focus was placed on the details of the design — such as the Pacific Ocean Blue colouring — to guarantee the pool appears as an extension of the ocean as well as the home.

The resulting synergy between the beach, pool and residence appears dynamic and effortless. Crystal Pools has triumphantly connected the three so successfully, that this pool was awarded Winner of Traditional or Geometric Concrete Pools \$50,001-\$100,000 by the Master Builders Association of NSW at the Excellence in Housing and Pool Awards 2010. **BH**
